CONTENTS OF VOLUME 68

Number 1, 14 July 1972

Jain, S. C. and Sobell, H. M., Stereochemistry of Actinomycin Binding to DNA. I. Refinement and Further Structural Details of the Actinomycin–Deoxyguanosine Crystalline Complex 1

Sobell, H. M. and Jain, S. C., Stereochemistry of Actinomycin Binding to DNA. II. Detailed Molecular Model of Actinomycin–DNA Complex and its Implications 21

Leach, C. K. and Ashworth, J. M., Characterization of DNA from the Cellular Slime Mould *Dictyostelium discoideum* after Growth of the Amoebae in Different Media 35

McMilin, K. D. and Russo, V. E. A., Maturation and Recombination of Bacteriophage Lambda DNA Molecules in the Absence of DNA Duplication 49

Stahl, F. W., McMilin, K. D., Stahl, M. M., Malone, R. E., Nozu, Y. and Russo, V. E. A., A Role for Recombination in the Production of "Free-loader" Lambda Bacteriophage Particles 57

Krell, K., Gottesman, M. E., Parks, J. S. and Eisenberg, M. A., Escape Synthesis of the Biotin Operon in Induced λ *b*2 Lysogens . . . 69

Stewart, J. W., Sherman, F., Jackson, M., Thomas, F. L. X. and Shipman, N., Demonstration of the UAA Ochre Codon in Bakers' Yeast by Amino-acid Replacements in Iso-1-cytochrome *c* 83

Clayton, R. K. and Haselkorn, R., Protein Components of Bacterial Photosynthetic Membranes 97

Tan, E. M. and Lerner, R. A., An Immunological Study of the Fates of Nuclear and Nucleolar Macromolecules during the Cell Cycle . . . 107

Pardon, J. F. and Wilkins, M. H. F., A Super-coil Model for Nucleohistone 115

Oey, J. L. and Knippers, R., Properties of the Isolated Gene *5* Protein of Bacteriophage fd 125

Alberts, B., Frey, L. and Delius, H., Isolation and Characterization of Gene *5* Protein of Filamentous Bacterial Viruses 139

Dea, I. C. M., McKinnon, A. A. and Rees, D. A., Tertiary and Quaternary Structure in Aqueous Polysaccharide Systems which model Cell Wall Cohesion: Reversible Changes in Conformation and Association of Agarose, Carrageenan and Galactomannans 153

Letters to the Editor—

Matthews, K. S. and Cole, R. D., Interaction of Lysozyme with f2 Bacteriophage 173

Chang, F. N. and Flaks, J. G., The Specific Cross-linking of Two Proteins from the *Escherichia coli* 30 s Ribosomal Subunit 177

Crowther, R. A. and Franklin, R. M., The Structure of the Groups of Nine Hexons from Adenovirus 181

Announcement 185

Number 2, 21 July 1972

Birktoft, J. J. and Blow, D. M., Structure of Crystalline α-Chymotrypsin. V. The Atomic Structure of Tosyl-α-chymotrypsin at 2 Å Resolution . 187

Pecht, I., Givol, D. and Sela, M., Dynamics of Hapten–Antibody Interaction. Studies on a Myeloma Protein with Anti-2,4-Dinitrophenyl Specificity . 241

Ohki, M., Correlation between Metabolism of Phosphatidylglycerol and Membrane Synthesis in *Escherichia coli* 249

Llinás, M., Klein, M. P. and Neilands, J. B., Solution Conformation of the Ferrichromes. III. A Comparative Proton Magnetic Resonance Study of Glycine- and Serine-containing Ferrichromes 265

Novick, R. P. and Brodsky, R., Studies on Plasmid Replication. I. Plasmid Incompatibility and Establishment in *Staphylococcus aureus*. . . . 285

Milcarek, C. and Weiss, B., Mutants of *Escherichia coli* with Altered Deoxyribonucleases. I. Isolation and Characterization of Mutants for Exonuclease III 303

Schlegel, R. A. and Thomas, C. A., Jr., Some Special Structural Features of Intracellular Bacteriophage T7 Concatemers 319

Fujime, S., Maruyama, M. and Asakura, S., Flexural Rigidity of Bacterial Flagella Studied by Quasielastic Scattering of Laser Light . . . 347

Setlow, J. K., Boling, M. E., Beattie, K. L. and Kimball, R. F., A Complex of Recombination and Repair Genes in *Haemophilus influenzae* . . 361

Letters to the Editor—

Setlow, J. K., Beattie, K. L. and Boling, M. E., Expression of a Recombination Gene on Transforming DNA in a Recombination-defective *Haemophilus influenzae* Recipient Cell 379

COHEN, I. and COHEN, C., A Tropomyosin-like Protein from Human Platelets 383

MOEWS, P. C. and BUNN, C. W., X-ray Crystallographic Study of the Rennin-like Enzyme of *Mucor pusillus* var. Lindt 389

NUMBER 3, 28 JULY 1972

CHOW, L. T., BOICE, L. B. and DAVIDSON, N., Map of the Partial Sequence Homology between DNA Molecules of *Bacillus subtilis* Bacteriophages SPO2 and ϕ105 391

BREWER, E. N., DNA Replication in *Physarum polycephalum* 401

MURTI, K. G., PRESCOTT, D. M. and PÈNE, J. J., DNA of Ciliated Protozoa. III. Binding of RNA Polymerase and Denaturation at the Ends of the Low-molecular Weight DNA in *Stylonychia* 413

ROBERTSON, H. D. and JEPPESEN, P. G. N., Extent of Variation in Three Related Bacteriophage RNA Molecules 417

STEWART, J. W. and SHERMAN, F., Demonstration of UAG as a Nonsense Codon in Bakers' Yeast by Amino-acid Replacements in Iso-1-cytochrome *c* . 429

BELLEMARE, G., CEDERGREN, R. J. and COUSINEAU, G. H., Comparison of the Physical and Optical Properties of *Escherichia coli* and Sea Urchin 5 s Ribosomal RNA's 445

CHANG, S. E., CASHMORE, A. R. and BROWN, D. M., Selective Modification of Uridine and Guanosine Residues in Tyrosine Transfer Ribonucleic Acid . 455

YOSHIDA, M. and RUDLAND, P. S., Ribosomal Binding of Bacteriophage RNA with Different Components of Initiation Factor F3 465

WRIGLEY, N. G., HEATHER, J. V., BONSIGNORE, A. and DE FLORA, A., Human Erythrocyte Glucose 6-Phosphate Dehydrogenase: Electron Microscope Studies on Structure and Interconversion of Tetramers, Dimers and Monomers 483

WAKE, R. G., Visualization of Reinitiated Chromosomes in *Bacillus subtilis* . 501

ISHIWATA, S. and FUJIME, S., Effect of Calcium Ions on the Flexibility of Reconstituted Thin Filaments of Muscle Studied by Quasielastic Scattering of Laser Light 511

FULLER NOEL, J. K. and SCHUMAKER, V. N., Sequential Conformational Changes with the Binding of NAD^+ to Rabbit Muscle Glyceraldehyde-3-phosphate Dehydrogenase 523

Letters to the Editor—

Bettex-Galland, M., Probst, E. and Behnke, O., Complex Formation with Heavy Meromyosin of the Isolated Actin-like Component of Thrombosthenin, the Contractile Protein from Blood Platelets . 533

Wimmer, E., Sequence Studies of Poliovirus RNA. I. Characterization of the 5′-Terminus 537

Engelberg, H., Inhibition of RNA Bacteriophage Replication by Rifampicin 541

Funatsu, G. and Wittmann, H. G., Ribosomal Proteins. XXXIII. Location of Amino-acid Replacements in Protein S12 isolated from *Escherichia coli* Mutants Resistant to Streptomycin . . . 547

Index to Volume 68

Actin-like component of thrombosthenin, complex formation with heavy meromyosin, 533
Actinomycin–DNA complex, detailed molecular model and its implications, 21
— –deoxyguanosine crystalline complex, structural details, 1
Adenovirus, structure of the groups of nine hexons, 181
Agarose, carrageenan and galactomannans, reversible conformation changes, 153
Alberts, B., Frey, L. & Delius, H., Isolation and characterization of gene *5* protein of filamentous bacterial viruses, 139
Antibody–hapten interaction dynamics, 241
Asakura, S. (see also Fujime, S.), 347
Ashworth, J. M. (see also Leach, C. K.), 35
Atomic structure of tosyl-α-chymotrypsin at 2 Å resolution, 187

Bacillus subtilis bacteriophages SPO2 and ϕ105, map of the partial sequence homology, 391
— —, visualization of reinitiated chromosomes, 501
Bacterial flagella, flexural rigidity studied using quasielastic scattering of laser light, 347
— photosynthetic membrane protein components, 97
— viruses, filamentous, isolation and characterization of gene *5* protein, 139
Bacteriophage f2, interaction with lysozyme, 173
— fd, properties of the isolated gene *5* protein, 125
— λ DNA molecules, recombination and maturation in the absence of DNA duplication, 49
— —, role for recombination in the production of "free loader" particles, 57
— — *b*2 lysogens, induced, escape synthesis of the biotin operon, 69
— RNA, extent of variation in three related bacteriophages, 417
—, —, inhibition of replication by rifampicin, 541
— — ribosomal binding with different components of initiation factor F3, 465
— T7 concatemers, intracellular, special structural features, 319
Bacteriophages SPO2 and ϕ105 of *Bacillus subtilis*, map of the partial sequence homology, 391
Bakers' yeast, demonstration of UAG as a nonsense codon by amino-acid replacements in iso-1-cytochrome *c*, 429
— —, UAA ochre codon demonstration by amino-acid replacements in iso-1-cytochrome *c*, 83
Beattie, K. L. (see also Setlow, J. K.), 361, 379
Behnke, O. (see also Bettex-Galland, M.), 533
Bellemare, G., Cedergren, R. J. & Cousineau, G. H., Comparison of the physical and optical properties of *Escherichia coli* and sea urchin 5 s ribosomal RNA's, 445
Bettex-Galland, M., Probst, E. & Behnke, O., Complex formation with heavy meromyosin of the isolated actin-like component of thrombosthenin, the contractile protein from blood platelets, 533
Biotin operon escape synthesis in induced λ *b*2 lysogens, 69
Birktoft, J. J. & Blow, D. M., Structure of crystalline α-chymotrypsin. V. The atomic structure of tosyl-α-chymotrypsin at 2 Å resolution, 187
Blood platelet contractile protein, thrombosthenin, complex formation with heavy meromyosin and an isolated actin-like component, 533
Blow, D. M. (see also Birktoft, J. J.), 187
Boice, L. D. (see also Chow, L. T.), 391
Boling, M. E. (see also Setlow, J. K.), 361, 379
Bonsignore, A. (see also Wrigley, N. G.), 483
Brewer, E. N., DNA replication in *Physarum polycephalum*, 401
Brodsky, R. (see also Novick, R. P.), 285
Brown, D. M. (see also Chang, S. E.), 455
Bunn, C. W. (see also Moews, P. C.), 389

Calcium ion, effect on the flexibility of reconstituted thin filaments of muscle studied by quasi-elastic scattering of laser light, 511

Carrageenan, agarose and galactomannans, reversible conformation changes, 153
Cashmore, A. R. (see also Chang, S. E.), 455
Cedergren, R. J. (see also Bellemare, G.), 445
Cellular slime mould *Dictyostelium discoideum*, DNA characterization after growth of the amoeba in different media, 35
Chang, F. N. & Flaks, J. G., The specific cross-linking of two proteins from the *Escherichia coli* 30 s ribosomal subunit, 177
Chang, S. E., Cashmore, A. R. & Brown, D. M., Selective modification of uridine and guanosine residues in tyrosine tRNA, 455
Chow, L. T., Boice, L. B. & Davidson, N., Map of the partial sequence homology between DNA molecules of *Bacillus subtilis* bacteriophages SPO2 and ϕ105, 391
Chromosome, reinitiated, visualization in *Bacillus subtilis*, 501
α-Chymotrypsin, crystalline, atomic structure of tosyl-α-chymotrypsin at 2 Å resolution, 187
Clayton, R. K. & Haselkorn, R., Protein components of bacterial photosynthetic membranes, 97
Cohen, Carolyn (see also Cohen, I.), 383
Cohen, I. & Cohen, Carolyn, A tropomyosin-like protein from human platelets, 383
Cole, R. D. (see also Matthews, K. S.), 173
Concatemers of intracellular bacteriophage T7, special structural features, 319
Cousineau, G. H. (see also Bellemare, G.), 445
Crowther, R. A. & Franklin, R. M., The structure of the groups of nine hexons from adenovirus, 181
Crystalline complex of actinomycin–deoxyguanosine, structural details, 1

Davidson, N. (see also Chow, L. T.), 391
Dea, I. C. M., McKinnon, A. A. & Rees, D. A., Tertiary and quaternary structure in aqueous polysaccharide systems which model cell wall cohesion: reversible changes in conformation and association of agarose, carrageenan and galactomannans, 153
De Flora, A. (see also Wrigley, N. G.), 483
Dehydrogenase for glucose 6-phosphate of human erythrocytes, electron microscope studies on structure and interconversion of tetramers, dimers and monomers, 483
— — glyceraldehyde-3-phosphate of rabbit muscle, sequential conformational changes with binding of NAD^+, 523
Delius, H. (see also Alberts, B.), 139
Deoxyribonucleases altered in mutants of *Escherichia coli*, 303
Deoxyribonucleic acid–actinomycin complex, detailed molecular model and its implications, 21
— — characterization from the cellular slime mould *Dictyostelium discoideum* after growth of the amoebae in different media, 35
— — duplication; maturation and recombination of phage λ DNA molecules in its absence, 49
— — low-molecular weight in *Stylonychia*, 413
— — molecules of *Bacillus subtilis* bacteriophages SPO2 and ϕ105, map of partial sequence homology, 391
— — molecules of bacteriophage λ, recombination and maturation in the absence of DNA duplication, 49
— — replication in *Physarum polycephalum*, 401
— — stereochemistry of actinomycin binding, structural details of actinomycin–deoxyguanosine complex, 1
— —, transforming, recombination gene expression in a recombination-defective *Haemophilus influenzae* recipient cell, 379
Dictyostelium discoideum, characterization of DNA from the cellular slime mould after growth of the amoeba in different media, 35
2,4-Dinitrophenyl, studies on a myeloma protein with anti-2,4-dinitrophenyl specificity, 241

Eisenberg, M. A. (see also Krell, K.), 69
Electron microscope studies on structure and interconversion of tetramers, dimers and monomers of human erythrocyte 6-phosphate dehydrogenase, 483
Engelberg, H., Inhibition of RNA bacteriophage replication by rifampicin, 541
Erythrocyte glucose 6-phosphate dehydrogenase, human, electron microscope studies on structure and interconversion of tetramers, dimers and monomers, 483
Escape synthesis of the biotin operon in induced λ *b*2 lysogens, 69
Escherichia coli 30 s ribosomal subunit, specific cross-linking of two proteins, 177
— —, correlation between phosphatidylglycerol and membrane synthesis, 249

Escherichia coli, isolation and characterization of mutants for exonuclease III, 303
— — mutants resistant to streptomycin, location of amino-acid replacements in protein S12, 547
— — and sea urchin 5 s ribosomal RNA's, comparison of physical and optical properties, 445
Exonuclease III mutant of *Escherichia coli*, isolation and characterization, 303

fd (see Bacteriophage)
F3 (see Initiation factor)
Ferrichromes, serine- and glycine-containing, comparative study using proton magnetic resonance, 265
Filamentous bacterial viruses, isolation and characterization of gene *5* protein, 139
Flagella of bacteria, flexural rigidity studied using quasielastic scattering of laser light, 347
Flaks, J. G. (see also Chang, F. N.), 177
Franklin, R. M. (see also Crowther, R. A.), 181
"Free loader" λ bacteriophage particles, role for recombination in their production, 57
Frey, L. (see also Alberts, B.), 139
Fujime, S. (see also Ishiwata, S.), 511
—, Maruyama, M. & Asakura, S., Flexural rigidity of bacterial flagella studied by quasielastic scattering of laser light, 347
Fuller Noel, J. K. & Shumaker, V. N., Sequential conformational changes with the binding of NAD^+ to rabbit muscle glyceraldehyde-3-phosphate dehydrogenase, 523
Funatsu, G. & Wittman, H. G., Ribosomal proteins. XXXIII. Location of amino-acid replacements in protein S12 isolated from *Escherichia coli* mutants resistant to streptomycin, 547

Galactomannans, agarose and carrageenan, reversible conformation changes, 153
Gene *5*, isolated protein properties in bacteriophage fd, 125
— — protein of filamentous bacterial viruses, isolation and characterization, 139
— complex, recombination and repair, in *Haemophilus*, 361
Givol, D. (see also Pecht, I.), 241
Glucose 6-phosphate dehydrogenase, human erythrocyte, electron microscope studies on structure and interconversion of tetramers, dimers and monomers, 483
Glyceraldehyde-3-phosphate dehydrogenase of rabbit muscle, sequential conformational changes with the binding of NAD^+, 523
Glycine- and serine-containing ferrichromes, comparative study using proton magnetic resonance, 265
Gottesman, M. E. (see also Krell, K.), 69
Guanosine and uridine residues in tyrosine tRNA, selective modification, 455

Haemophilus influenzae, complex of recombination and repair genes, 361
— —, expression of a recombination gene on transforming DNA in a recombination-defective recipient cell, 379
Hapten–antibody interaction dynamics, 241
Haselkorn, R. (see also Clayton, R. K.), 97
Heather, J. V. (see also Wrigley, N. G.), 483
Hexons, structure of the groups of nine hexons of adenovirus, 181
Human erythrocyte glucose 6-phosphate dehydrogenase, electron microscope studies on structure and interconversion of tetramers, dimers, and monomers, 483
— platelets, tropomyosin-like protein from, 383

Immunological study of the fates of nuclear and nucleolar macromolecules during the cell cycle, 107
Intracellular bacteriophage T7 concatemers, special structural features, 319
Initiation factor F3, ribosomal binding of bacteriophage RNA with different components, 465
Ishiwata, S. & Fujime, S., Effect of calcium ions on the flexibility of reconstituted thin filaments of muscle studied by quasielastic scattering of laser light, 511
Iso-1-cytochrome *c* amino-acid replacements used to demonstrate the UAA codon in bakers' yeast, 83
— — — — — — demonstrate UAG as a nonsense codon in bakers' yeast, 429
